

LED Ribbon

Handle LED strip with care to avoid breaking micro-solder connections. Avoid sharp bends.

FEATURES

- 2oz copper commercial grade PCB
- Available in 5m and 10m rolls
- Enclosed in silicone tube
- IP64 rated waterproofing
- Anti-oxidation, UV protection
- Factory connectors on both ends
- 3M double sided tape on back
- Can be cut every 50mm
- Available in single color

APPLICATIONS

- Undercabinet
- Toe-kicking lighting
- Cove lighting
- Accent lighting
- Decorative lighting
- Valance lighting

CONNECTORS

RIB-1	RIB-2
T1-8mm	T1-10mm
T2-8mm	T2-10mm
SP-8mm	SP-10mm

ALUMINUM PROFILE/TRACK

It is recommended to use an aluminum profile when installing LED ribbon. The aluminum profile provides a heatsink, improving the lifespan of your lights. It is strongly recommended when installing in under-cabinet or under-millwork, for heat management.

Model	CCT (K)	Length (m)	LED QTY	LED Type	Light Output (Lumen/m)	Beam Angle	Voltage (VDC)	IP	Max Power Consumption (W/m)	Copper Ounce	Continuous Connection (m)
